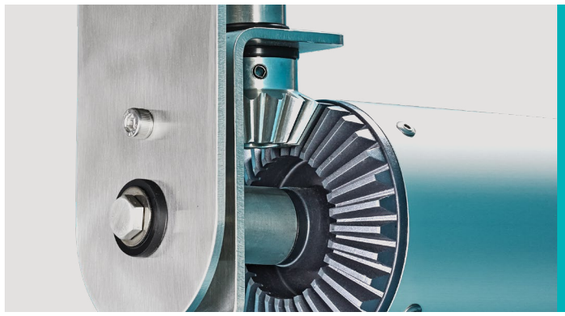
POOL COVER SOLUTIONS

Sunbather

Founded in Melbourne in 1974, Sunbather quickly became a leader in the Solar Pool Heating industry. Sunbather's commitment to innovation has earned the company recognition as the most awarded pool heating and covers company in Australia, as acknowledged by industry experts. Our focus on cutting-edge technology and exceptional customer service has allowed us to consistently deliver high-quality products that exceed expectations.



Quality matters

Quality and reliability are critical. Our products are built to the highest standard utilising carefully selected high-grade materials and premium finishes.

Designed & built in Australia

Servicing Australia and New Zealand, Sunbather continue to engineer and manufacture pool systems right here in Australia.

CLIMATE CARE CERTIFIED

Climate Care Certified

We're dedicated to conserving the natural environment. Our systems are manufactured using sustainable processes and deliver water savings, energy efficiency, and reliability. All Climate Care Certified products undergo third-party testing.

Why cover your pool?

A pool cover is an essential accessory for swimming pools, offering both functional and environmental advantages. It significantly reduces evaporation, leading to water conservation, which is especially crucial in regions facing water scarcity. Less evaporation also means a decreased need to replenish the pool with fresh water and chemicals, saving resources and reducing chemical use.

For heated pools, a cover retains warmth, therefore reducing energy consumption and the associated greenhouse gas emissions from fossil fuel heaters.

This energy-saving attribute not only diminishes one's carbon footprint but also results in substantial cost savings over time.

By incorporating a pool cover, pool owners are making an environmentally responsible choice, contributing to water and energy conservation while also enjoying the practical benefits of cleaner and safer pool water.

At Sunbather, we offer a wide range of pool covers to suit various pool environments. Browse our pool cover selection today and start enjoying the benefits of water savings and a more energy-efficient pool.

Rollers Benefits

One of the most significant issues when covering a pool is where does the cover go? A roller not only stores and protects your cover but also makes its use so much easier.

We have roller solutions to suit any situation. Whether you want it kept on a wall, under a seat, wheeled away or completely hidden underground.

Although our rollers are fully compatible with most Thermal and Bubble covers, we highly recommend using a Sunbather cover matched with one of our rollers for superior longevity and reliability.

Did you know?

- Pools lose 92% of their heat through the waters surface, with the remaining 8% lost through the walls and floors.
- Water lost through evaporation from an uncovered pool can equal twice that pool's entire volume of water each year.
- A pool cover will extend your solar heated pool swimming season.
- A pool cover will halve your running costs when using a gas heater or heat pump.
- A pool cover will save you money on chemicals.

Thermal Pool Covers

Ideal for heated pools

Discover unparalleled excellence with our Thermal Pool Covers, providing superior heat retention, durability, aesthetic, and cost-savings.

Did you know an uncovered heated swimming pool can lose double its water volume over a year? Our Thermal Pool Covers are here to counter this issue—saving up to 99% of water loss and retaining twice the amount of heat compared to alternative covers.

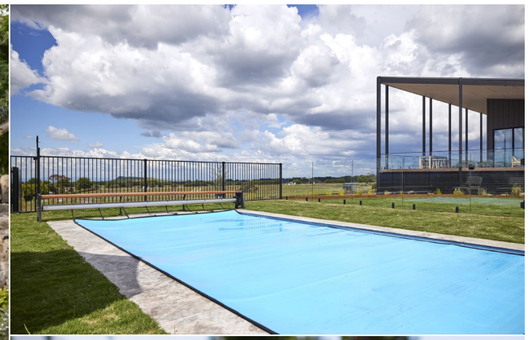
Designed specifically for heated pools, our thermal covers offer efficient temperature regulation without generating excess heat on hot days. Furthermore, they protect your pool from debris and sunlight that can cause algae growth. This means you'll need fewer chemicals to keep your pool clean, leading to further savings.

Renowned for their robust durability, our Thermal Pool Covers are crafted to withstand the test of time, outlasting many other options on the market.

They are constructed with Sunbather's UV stabilised foam, featuring a unique crosslinked cell structure that delivers remarkable strength and flexibility. This foam is adeptly encased between a woven top and a waterproof bottom sheet, ensuring optimal performance. Their compact and lightweight design allows for effortless rolling when not in use.

To harmonize with your pool's aesthetic, we offer a sophisticated color palette including dark blue, light blue, and silver grey.

Invest in our Thermal Pool Cover today and enjoy superior savings, outstanding performance, and enhanced sustainability.



Features & Benefits

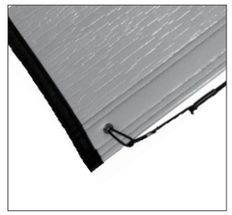
- Sunbather Thermal Covers carry the Smart Approved Watermark and are Climate Care Certified.
- 2000 micron (2mm); 4500 micron (4.5mm) thicknesses for high strength.
- Excellent heat & thermal capabilities, keeping pools warmer.
- They are arguably the best water saving device you can install in a home.

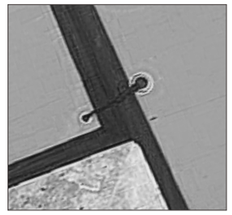
Colours

MID BLUE	LIGHT BLUE	DARK BLUE	GREY
2mm	4.5mm	4.5mm	4.5mm

Options

- Protective Edging 40mm (Sewn)
- Rope & Eyelet Hinge
- Trailing End
- Leading End
- Wind Edge Curved
- Wind Edge Straight
- Sewn Hinge





Automatic CVX Covers

Ideal for heated pools

Experience unmatched convenience with our premium European-engineered Automatic CVX Covers, meticulously designed to be the easiest pool cover to use. With a simple key turn, the quiet, motorised roller effortlessly deploys and retracts the cover, eliminating the need for manual rolling, ensuring a hassle-free pool experience. These innovative covers redefine pool security and ease of use.

The CVX foam-filled slats are built for durability, capable of withstanding extreme weather conditions, from hail to freezing temperatures. This sturdy construction helps in keeping your pool cleaner by preventing debris and algae growth, ultimately reducing maintenance efforts and expenses.

For added peace of mind, consider engineering and constructing your pool with a CVX Cover security ledge. This feature is designed for family safety, robust enough to support an adult, providing an additional layer of security.

The CVX Cover excels in energy efficiency and water conservation, too. Its superior insulation dramatically reduces heat loss and virtually eliminates water evaporation, leading to significant savings on energy, water and chemical costs. Our commitment to the environment is reinforced by our Climate Care Certification for these covers.

Customise your pool experience with Sunbather's wide range of design options. Choose from above or below deck models available in various colours to seamlessly complement your pool's aesthetics.

Features

- Turn of a key to deploy or remove cover
- Patented CVX foam-filled slats
- Hail resistant
- Multiple installation options available
- Save water, heat, chemicals and money
- Eliminates water evaporation by up to 99%

CLIMATE CARE CERTIFIED

On Deck Tubular Roller

Standard

- 24v powered 200mm diameter roller with forward and reverse operating switch
- Connected to 240v mains with step down transformer to 24v motor
- 100mm x 100mm square end supports with base plate are fixed to the pool coping
- Key switch control

Heavy Duty

- Available on request

Under Deck Tubular Roller

Standard

- 24v Tube motor (built into roller tube)
- Ideal for smaller pools, special designs and pools with low freeboard or high water lines
- Key switch control.

Heavy Duty

- 24v Tube motor (built into roller tube)
- Suitable for the in-floor option or larger pools
- Key switch control

Installation Options

Cantilever Bracket

- Stainless steel cantilever brackets which eliminate the need for a beam and raised step over the pit. This allows for a 'same level' surface right around the pool and a standard freeboard

Pit Beam & Tray Assembly

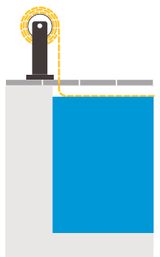
- Suitable for in-seat or in-floor installations
- Includes fibreglass pit lid

Colour options

Top Mount

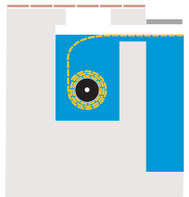
Mount the cover and roller drive mechanism on top of the pool deck.

Suitable for retrospective installations.



Raised Pit Canopy

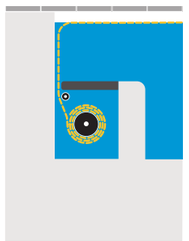
Mount the cover and roller drive mechanism in a water filled pit outside the pool and under an elevated canopy with a removable lid that must be made of timber with a concrete or steel beam.



In-Seat

Mount the cover and roller drive mechanism under water in a pit with a fibre-glass or stainless steel lid that forms a pool seat.

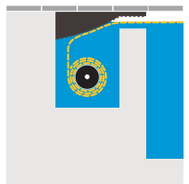
Seat Lid - stainless steel, fibreglass or tiled.



Cantilever Pit Lid

Mount the cover and roller drive mechanism in a water filled pit outside the pool and under a removable lid that is level with the pool deck.

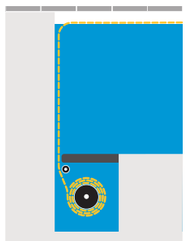
This option requires cantilever brackets to support the lid.



In-Floor

Mount the cover and roller drive mechanism under water in a pit below the pool floor with a fibre-glass or stainless steel lid.

Pit Lid - stainless steel, fibreglass or tiled.



Winter Mesh Covers

Ideal for leafy pools / winter protection

Our Winter Mesh Covers are the ideal solution for pool owners seeking low maintenance and peace of mind during the colder months.

Made of lightweight yet durable woven material, these covers fit snugly over your pool, ensuring water remains pristine, free from leaves, dirt, and debris. By keeping out sunlight, they also combat the growth of algae, further reducing your maintenance chores.

Beyond just cleanliness, these covers play an integral role in safeguarding pool equipment. They help prevent baskets from clogging with leaves and deter ducks and small animals from seeking refuge in your pool. Additionally, by minimizing water evaporation by up to 50%, they contribute to significant water conservation, saving you both time and money.

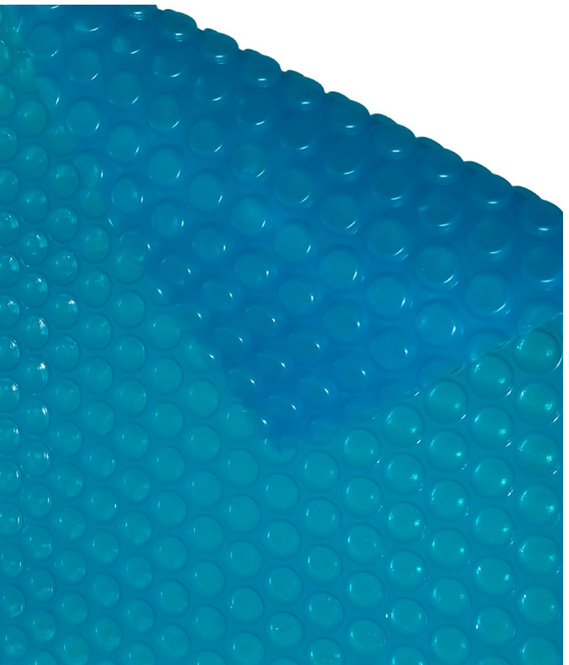
With a straightforward attachment method, our Winter Mesh Covers promise quick and easy application and removal. More than just a practical tool, they offer pool owners invaluable reassurance, knowing that even when the pool isn't the focus, it remains protected and well-maintained.

Features & Benefits

- Lightweight super strong woven material
- Keeps out leaves, dirt and debris
- Reduces algae growth
- Quick and easy to use

Colours

BLACK BLUE GREEN TAN GREY



Bubble Covers

Ideal for non-heated pools

Bubble covers act as passive solar heaters, their translucent properties allowing sunlight to penetrate and warm the water beneath. Once warmed, the cover retains a portion of this warmth, adding an extra touch of comfort to your pool during the warmer months.

While bubble covers may not match the effectiveness of Thermal or Automatic CVX covers in preventing heat loss, they stand alongside all our covers in excelling at reducing up to 99% evaporation. This feature of water conservation is not only environmentally responsible but also results in a decrease in chemical consumption, making bubble covers a smart choice.

Opting for a bubble cover is an affordable choice that aids in conserving water, reducing chemical use, and offering a slight temperature elevation during the warmer seasons, making it a beneficial addition to your pool.
