DAISY POWER

Daisy power electric rollers | Retro kits available | Battery powered AC charge + solar models

ELECTRICAL ROLLERS

✓ daisy power electric rollers | ✓ retro kits available | ✓ battery powered AC charge + solar models

THE DAISY POWER SERIES IS A PART OF OUR ELECTRIC POOL COVER ROLLER RANGE THAT OFFER THE CONVENIENCE OF AN ELECTRIC ROLLER WITHOUT TAKING UP TOO MUCH SPACE BESIDE YOUR POOL. AN EASY-TO-USE ELECTRIC OPTION, IT ROLLS UP YOUR POOL COVER IN MINUTES WITH JUST THE PRESS OF A BUTTON.

The standard Daisy Power roller comes as a 12V battery operated electric roller with AC charger, two remotes and control buttons on the cast aluminium housing mounted on the end frame.

This simple and easy to use electric option allows pool owners to roll up their cover in minutes with the press of a button – something our customers have been waiting for.

Daisy Power also has a disengage mechanism, which allows for freewheeling rollout and rollup of the cover, and is a feature unique to Daisy.

Daisy Power can be retrofitted onto most existing 100mm Daisy Rollers through a retro kit.

Optional extras for Daisy Power include a solar panel, which clamps to the end frame and comes with an aligning aid for best performance. This maintains the battery charge using the sun's rays, meaning your Daisy Power roller is always ready to go!

Customers can also purchase a PV post to mount the panel on a post away from the roller frame.

Daisy Power style options include the standard height ST Roller, Squat Profile, Wall Mount and Solar Panel Kit.

Warranty period on electrical components (remote/control housing/tube motor/AC charger) is 2 years (this warranty does not cover battery failure). All mechanical parts 10 year pro rata warranty

For more information about the Power Roller, contact the Daisy team today.

| Code | Description | Retail Price |
